Passionate about continuous growth and eager to apply my skills, learn from industry leaders, and contribute to meaningful projects by building efficient, scalable, and user-friendly applications.

## PROJECTS

### Comingle - Social Media App

A secure social media platform that enables users to connect with friends, share media, and communicate through various modes. The platform offers both free and premium features for an enriched and protected social experience, built using **Clean Architecture** and **SOLID** principles to ensure maintainability, scalability, and robustness.

- **Secure Authentication:** User registration and login with Gmail OTP integration for account verification.
- **Post Management:** Users can create, schedule, like, unlike, comment, share, report, and delete posts.
- **Communication:** Integrated text, audio, and video chat features, along with file sharing capabilities.
- **Premium Features:** Includes verified badges and daily following limits to enhance user experience.
- **Real-time Notifications:** Keeps users updated on interactions and platform activity.
- **Friend Suggestions:** Automated suggestions to foster new connections.
- **Admin Controls:** Manage reports, hiding posts, blocking users, and analyzing app performance.

## EXPERTISE

- HTML
- CSS
- JavaScript
- TypeScript
- React
- Redux
- Express.js
- Bootstrap
- Tailwind CSS
- Node.js
- MVC Architecture
- Clean Architecture
- SOLID Principles
- MongoDB
- WebRTC
- Socket.io
- Docker
- JWT
- Passport.js

## Volttron- Ecommerce App

This platform is designed to provide a seamless and secure shopping experience, featuring a modern interface and intuitive navigation.

- **Secure Authentication:** User registration and login with Gmail OTP integration for account verification.
- **Product Search & Filtering:** Facilitates easy navigation with detailed product descriptions and high-quality images.
- **Shopping Cart & Wishlist:** Allows users to manage their purchases and save items for later.
- **Payment Integration:** Secure payment processing through Razorpay.
- **Order Management:** Includes order tracking, wallet management, and order history.
- **User Interaction:** User reviews and ratings for products.
- **Admin Dashboard:** Manage products, orders, and users efficiently.
